

ITS *Austria*

mobility as a service

www.its-austria.info

The „ITS Austria“ platform

The “ITS Austria” platform connects the Austrian agents in the fields of traffic, transport and logistics, with a view towards a sustainable structure in the Austrian mobility system.

Using the Austrian **ITS Action Plan** as a start point, actors from areas such as the public sector, the economy, industry and research work together, with the common target of a strong representation of Austrian competences in Intelligent Transport Systems (ITS) on an international level.

The ITS Austria platform should aid the special processes for agreement, coordination and monitoring required for new and existing tools, such as the European ITS Directive or the national ITS law.

The „ITS Austria“ platform

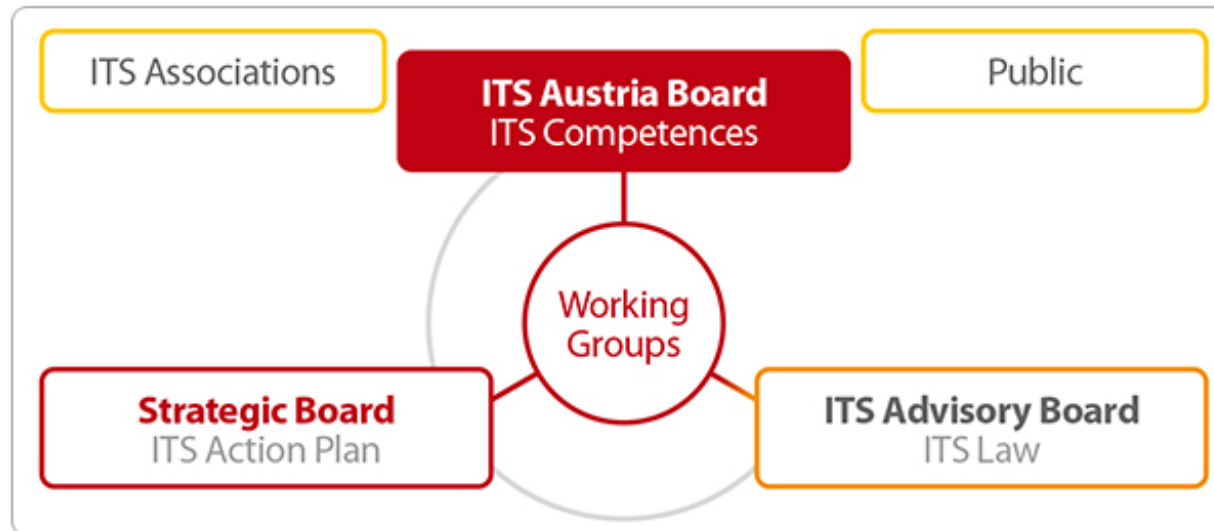

Objectives of the platform:

- To help transfer know-how to build up ITS competence
- To strengthen and expand the national ITS network
- To support the establishment of framework conditions for a harmonised deployment
- To increase the level of awareness for the users of ITS in policy, industry and the public sector

ITS Austria

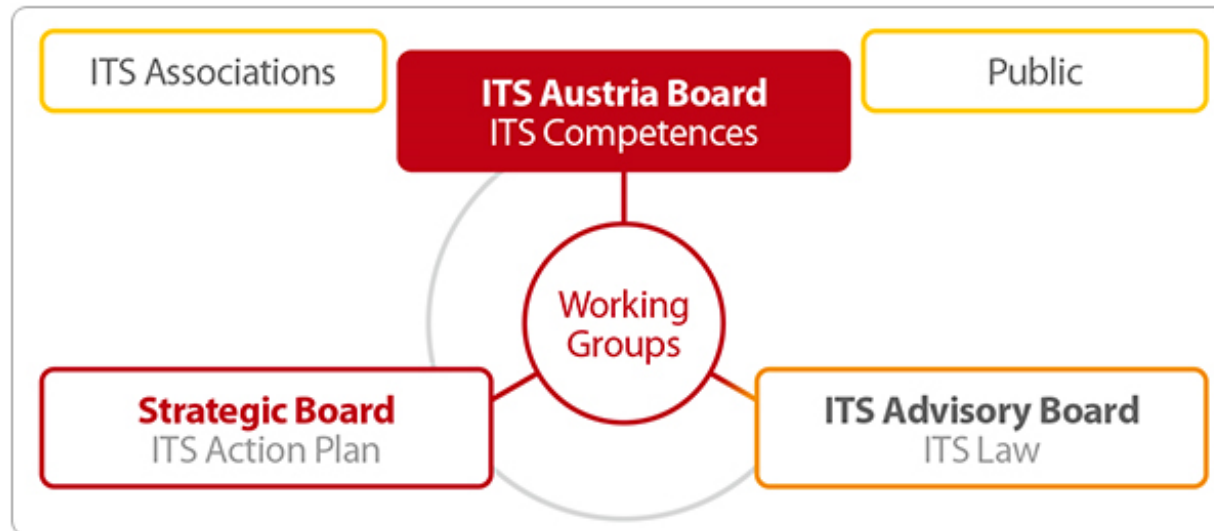

is committed to contribute to an interoperable
multimodal mobility system.

The ITS Austria Board

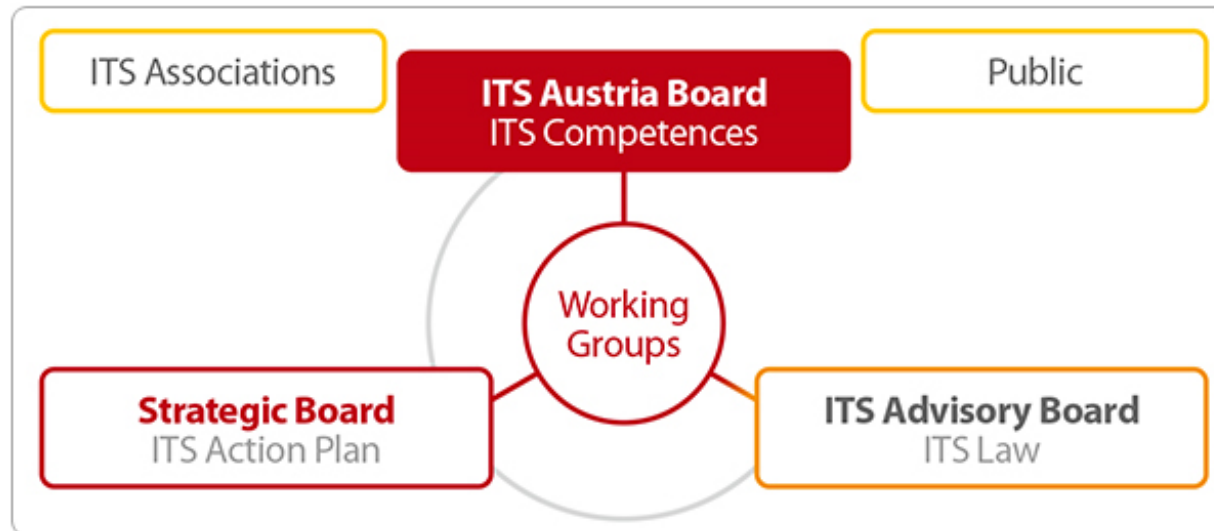

The **ITS Austria Board** is the external interface and serves to display and disseminate the commonly developed positions and issues, as well as existing ITS expertise. This takes place at events or in cooperation with other European and international ITS platforms. The members of the ITS Austria Board meet together with actors of the large Austrian associations related to ITS (ATTC, GSV and ÖVG), countries, communities and infrastructure operators.

The Strategic Board

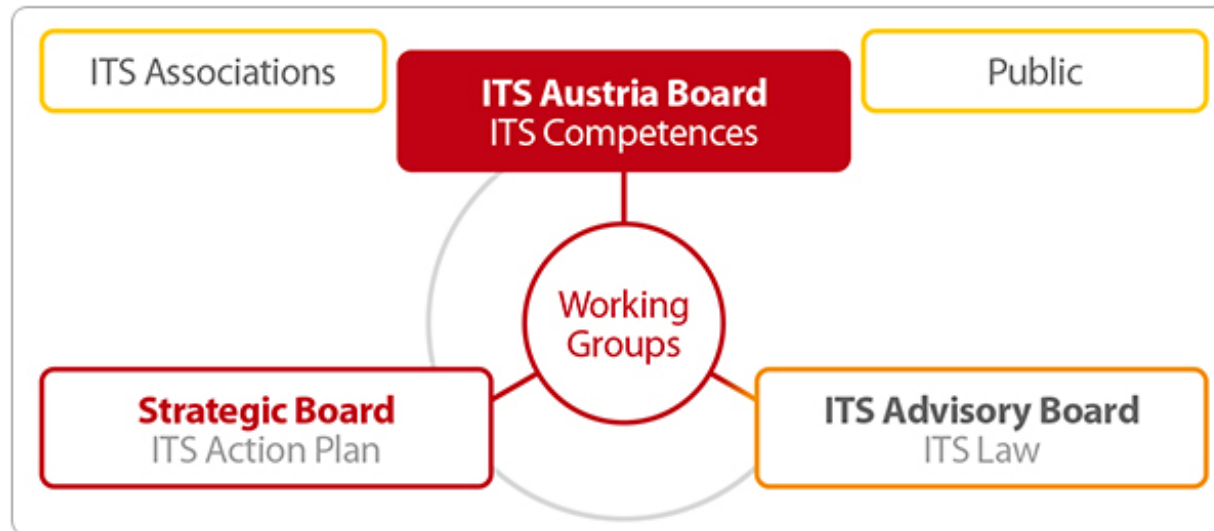

The **Strategic Board** is dedicated to monitoring ITS activity in Austria and the development of measures as input to further the ITS Action Plan. As part of the Austrian Ministry of Transport, Innovation and Technology (bmvit), the Strategic Advisory Board looks critically at ITS tools and measures past and present. The members of the Strategic Board are appointed by bmvit.

ITS Advisory Board

The **ITS Advisory Board** is defined in the Austrian ITS law and its function is purely advisory. The board is consulted by bmvit before remittal of federal regulations, and is made up of core members and consultant experts nominated by the bmvit.

Working Groups

Working Groups can be called for the development of positions and topics from all committees of ITS Austria. The structure and content of the working group are defined by the respective board.

The ITS Austria platform is organising upcoming events:

- **13th February 2014** - Working Group "Talents & Diversity"
- **Summer of 2014** - Workshop on "Big Data"
- **25th September 2014** - ITS Austria Conference
- **26th September 2014** - Networking with the Danube Region
